

27 July 1961

Dr. Robert H. Bahmer
Deputy Archivist of the United States
National Archives and Records Service
Washington 25, D.C.

Dear Dr. Bahmer:

This is in reply to letters of October 10, 1960 and March 13, 1961 from the Office of Records Management proposing disposal of 19,000 cubic feet of denazification records in the custody of the Federal Records Center, Kansas City, Missouri. This Agency concurs in the proposed destruction.

One agency component has been exploiting certain records described in the schedule during the past several years. It is likely that these people may wish to select and ship to Washington an estimated 1500 boxes of material prior to January 1, 1963.

Sincerely yours,

Chief, Records Management Staff
